THE DINGLEY LAW AND SILK.

The annual meeting of the Silk Association of America was held at the Silk Exchange Building. Broadway and Broome-st, yesterday .11 was at tended by representatives of the business from al over the country. The condition of the trade was thoroughly discussed and several measures for the bettering of the condition of business were taken u In his annual report, the secretary, Franklin

Allen, said:

The last year has been an eventful one in the history of the slik industry of America. It has witnessed the first year's operation of the Dingley Tariff act, approved by President McKinley, July 3, 1897. By that act specific duties are largely applied to imported slik goods, instead of exclusivoly 6d valorem rates as heretofore. The first noticeable result is that, although the volume of forcam textiles imported decreased three and one-half million of dollars in its first year, the revenue duty collected by the Government was about the same. The second noticeable result is that the average rate of duty on all forcing slik goods entering into home consumption during the year ending June 20, 1898, is higher than it has been in differn years, and is 74, per cent higher than for the year 1897. The Dingley Tariff act was only in operation during the months of the last fiscal year. Silk threads, or yarns or spun, were entered for consumption in the value of \$1,248.54 and paid the average duty reduced to ad valorem of 27.8 per cent. All classes of textiles, including velucies, plushes, laces, embroideries, knit goods and wearing apparel, to the value of \$2,401.92, paid an average duty of 55 per cent reduced to ad valorem rates of duty were considerably undervalued and which could not previously be profitably manufactured here.

ERENCH LINES PIGEON SERVICE.

rier pigeon, released at sea from La Champagne, which is due here next Sunday, had made its way safely to Paris, bearing a mesage to M. Paoli, Commissary of Police.

This is a triumph for the new system of carrier pigeon service introduced by the French Line. The object is to be able to send a message ashore at any time when a vessel might become disabled at sea. This would bring aid, perhaps, and at least would allay the painful anxieties when a passenger steamer is overdue.

REFUSED TO AID THE POLICE. Two citizens who refused to aid a police officer

when called on for assistance were committed yesterday by Justice Nevin, of Jersey City, for trial for aiding and abetting a prisoner to escape. Policeman Maxwell went into a saloon to arrest two tineves, Jeremiah Murphy and John Corbett, who had robbed another saloon and stolen \$40. The officer forced the two men into a small, dark room and closed the door on them, and, offering his keys, urged two men who were in the saloon, Patrick Murphy, of No 632 Grove-at., and Nelson Drake, of No. 183 Eleventh-st., to go to the signal-box and No. 183 Eleventh-st., to go to the signal-box and summon the patrol-wagon. The two men refused, and also declined to go out and call a policeman from an adjoining post. Maxwell had a desperate light with the two thieves, and Drake and Murphy offered no aid. Corbett escaped, and his "pal" had to be clubbed into submission. Justice Nevin summoned Drake and Murphy yesterday. They pleaded ignorance of the law, but Justice Nevin said it was time that some citizens were taught their duty, and he held them for the action of the Grand Jury.

In September, 1869, when the city acquires control of the Pequannock plant, there will be fifty million gallons daily supplied. It is necessary to procure an additional supply of pure water for emergeacies. Recently Arthur Connelly a contractor, offered to drive wells enough at Believille to give a daily supply of hetween five million and ten million gallons. He was told to make a written offer to the Roard, and this was presented at the meeting yesterday. Philips & Worthington, a contracting firm, asked for an opportunity to present a plan to the matter to competition, and a motion was made that the engineer be instructed to advertise for bids. Commissioner Van Duyne objected, saying that he thought Engineer Jacobson had reported to the Hoard that the driven-well plan of water supply was impracticable. He favored a contract with the East Jersey Water Company, and urged upon the Board the importance of the meter system. A warm discussion arose between Mr. Van Duyne and President Hewson, in which the latter was accused of talking for political effect. A motion to advertise for bids was adopted.

Tired of winter fare, the family requires peculiar ingenuity in the commissariat department to carry it over the transition to summer. Here is just where skilful cookery comes in, and the greatest aid to skilful cookery is the gas range. It makes it the easiest thing in the world to improvise a dish to appeal to a flagging appetite. With heat instantly at command, and perfectly under control, it is a mere pleasure to whip up a pudding or spring a surprise in the shape of a delicious saute, or a meat ple with sauce piquante, and as for broiling, everybody knows that it is done to perfection by the gas flame. Half of a chicken or a chop broiled to a juicy brown and slipped upon the plate of a man who thinks he has lost his appetite will put him in the way of finding it speedily. There is, in fact, no greater resource for the perplexed housekeeper in the trying time between seasons than the gas range, enabling her, as it does, to provide delicate and dainty.
